

Homework is an essential part of learning

HOMework POLICY

Homework consists of:

1. Written/learning work given by teacher.
Revision of previous work covered in preparation for examinations, i.e. exam papers.
Research and project work related to subject.
2. Organisation of homework is an important step in motivating students to promote learning and achievement. It consolidates work completed in class and encourages self directed study.
3. It is vital for every student to have a homework journal which is available in school. This is an important communication link between home and school and encourages parents to take an interest in and share responsibility for their childrens' progress.
4. Each subject Department will draw up guidelines for appropriate homework within their subject area.
